This journal is printed on acid-free paper.

Contents of Volume 143

Number 1, September 1993

Oxidative Methylation of Toluene with Methane over Superbasic Catalysts: A Selective Route to Styrene and Ethylbenzene through Alternative Feedstocks
Ashraf Z. Khan and Eli Ruckenstein 1

Reversible Activity Enhancement of SiO_2-Supported Group VIII Metal Catalysts by Pretreatment Temperature
Junji Inukai, Kiyotaka Asakura, and Yasuhiro Iwasawa 22

The Catalytic Conversion of Methyl Chloride to Ethylene and Propylene over Phosphorus-Modified Mg–ZSM-5 Zeolites
Yao Sun, Sharelle M. Campbell, Jack H. Lunsford, Gregg E. Lewis, Dale Palke, and Li-Min Tau 32

Deactivation of HDT Catalysts by Formation of Silica Gels from Silicone Oil. Characterization of Spent Catalysts from HDT of Coker Naphtha Using ^{29}Si and ^{13}C CP/MAS NMR
Lars Kellberg, Per Zeuthen, and Hans J. Jakobsen..... 45

Onium Chains–Silica as Catalytic Support: Application to Hydroformylation
L. Hong and E. Ruckenstein 52

Effect of Pretreatment Conditions of Si–CuCl Mixtures on the Rate and Selectivity in the Reaction of Silicon with Methanol Using Copper(I) Chloride Catalyst
Masaki Okamoto, Mituaki Osaka, Ken-ichi Yamamoto, Eiichi Suzuki, and Yoshio Ono 64

Evidence for a Second CO Oxidation Mechanism on Rh/Ceria
G. S. Zafiris and R. J. Gorte 86

The Kinetics of Propylene Metathesis Catalyzed by a Molybdenum (100) Single Crystal
L. P. Wang, C. Soto, and W. T. Tysoe 92

Reduction by Hydrogen of Oxidized Surfaces of Fe(100) and Pt-Covered Fe(100)
G. W. R. Leibbrandt and F. H. P. M. Habraken..... 102

Hydrogen Pressure Dependence of the Ring-Opening Reactions of Propylcyclobutane over Pt/SiO_2 Catalyst at Different Temperatures
Béla Török, István Pálinkó, Árpád Molnár, and Mihály Bartók..... 111

Pt/MgO as Catalyst for Hydrogenolysis Reactions of C_5 and C_6 Hydrocarbons: Evidence for Metal–Support Interactions
J. K. A. Clarke, M. J. Bradley, L. A. J. Garvie, A. J. Craven, and T. Baird 122

Infrared Spectroscopic Study of the Adsorption and Dissociation of Methyl Halides on Silica-Supported Pd
J. Raskó, J. Bontovics, and F. Solymosi..... 138

A Proposal for the Quantitative Assessment of Heterogeneous Photocatalytic Processes
Leonardo Palmisano, Vincenzo Augugliaro, Renzo Campostrini, and Mario Schiavello 149

Influence of the Preparation Mode on Metal–Support Interactions in Pt/TiO_2 Catalysts
A. Dauscher, R. Touroude, G. Maire, J. Kizling, and M. Boutonnet-Kizling 155

Fischer–Tropsch Reaction Studies with Supported Ruthenium Catalysts. III. The Production of Alkenes and High Molecular Weight Hydrocarbons in a Fixed Bed Reactor
Raymond C. Everson and Harko Mulder 166

The Interaction of Benzene and Toluene with Rh Dispersed on SiO_2, Al_2O_3, and TiO_2 Carriers
Theophilos Ioannides and Xenophon E. Verykios..... 175

The Deactivation of Nickel Catalysts in the Hydrogenation of Acetonitrile
M. J. F. M. Verhaak, A. J. van Dillen, and J. W. Geus 187

Chromia Supported on Titania. I. An EPR Study of the Chemical and Structural Changes Occurring during Catalyst Genesis
K. Köhler, C. W. Schläpfer, A. von Zelewsky, J. Nickl, J. Engweiler, and A. Baiker 201

Selective Oxidation of Butane to Maleic Anhydride on a Vanadium–Phosphorus Oxide Catalyst: Promotional Effects of Zirconium
Ravindra Sant and Arvind Varma 215

Crystalline Microporous MAPO-36 Molecular Sieve: Synthesis and Characterization
Deepak B. Akolekar..... 227

Mechanism of Hydrodesulfurization of Dibenzothiophene on $Co–Mo/Al_2O_3$ and Co/Al_2O_3 Catalyst by the Use of Radioisotope ^{35}S Tracer
Toshiaki Kabe, Weihua Qian, Shinji Ogawa, and Atsushi Ishihara 239

Reactions of 2- and 3-Methylpentane, Methylcyclopentane, Cyclopentane, and Cyclohexane on Activated Mo_2C
Cuong Pham-Huu, Marc J. Ledoux, and Jean Guille 249

A Basic Approach to Evaluate Methane Partial Oxidation Catalysts
A. Parmaliana, F. Frusteri, A. Mezzapica, D. Miceli, M. S. Scurrell, and N. Giordano..... 262

Studies on Crystalline Microporous Vanadium Silicates. IV. Synthesis, Characterization, and Catalytic Properties of V–NCL-1, a Large-Pore Molecular Sieve
K. Ramesh Reddy, A. V. Ramaswamy, and P. Ratnasamy..... 275

Oxidative Coupling of Methane over Oxide-Supported Barium Catalysts
Dhammike Dissanayake, Jack H. Lunsford, and Michael P. Rosynek 286

Notes

A Temperature-Programmed Reaction Method for Catalyst Testing in the Partial Oxidation of Methane to Formaldehyde
F. Arena, F. Frusteri, A. Parmaliana, and N. Giordano 299

Preparation and Characterization of Fluid Cracking Catalysts Containing Pollucite
R. Kumar, E. F. Rakiewicz, and K. Rajagopalan..... 304

The Methanation of CO and CO_2 over a Rh/Al_2O_3 Catalyst Using a Pulsed-Flow Microreactor
M. Bowker, T. J. Cassidy, A. T. Ashcroft, and A. K. Cheetham..... 308

Preparation of Metal/Zeolite Catalysts: Formation of Palladium Aquocomplexes in the Precursor of Palladium–Mordenite Catalysts
Brian T. Carvill, Bruce A. Lerner, Zongchao Zhang, and Wolfgang M. H. Sachtler 314

The Possible Interpretation of XP Spectra of Supported Pt Catalysts in the Oxidized and Sulfided State
Zoltán Paál, Martin Muhler, and Robert Schlögl 318

Letter to the Editors

States of Platinum in the Zirconium Oxide Promoted by Platinum and Sulfate Ion
Kohki Ebitani, Hidetaka Konno, Tsunehiro Tanaka, and Hideshi Hattori 322

Number 2, October 1993

Reactivity of Molybdovanadophosphoric Acids: Influence of the Presence of Vanadium in the Primary and Secondary Structure
Daniele Casarini, Gabriele Centi, Pavel Jírů, Virginia Lena, and Zdena Tvarůžková 325

Bimetallic Synergy in Cobalt–Ruthenium Fischer–Tropsch Synthesis Catalysts
Enrique Iglesia, Stuart L. Soled, Rocco A. Fiato, and Grayson H. Via 345

Radioactive Tracer Techniques for Study of Reactions on Industrial Catalysts. I. Kinetics of the Enhanced Desorption of Carbon Monoxide Due to the Influence of Carbon Monoxide in the Gas Phase
Ulf Schröder and Nils-Herman Schöön 369

Radioactive Tracer Techniques for Study of Reactions on Industrial Catalysts. II. Enhanced Desorption of CO from a Pd/Al_2O_3 Catalyst Due to the Influence of C_2H_2 and NO in the Gas Phase
U. Schröder and N.-H. Schöön 381

Analysis of Active Site Distribution in ZSM-5 Crystals by Infrared Microscopy
F. Schüth and R. Althoff 388

Hydrogen Temperature-Programmed Desorption (H_2 TPD) of Supported Platinum Catalysts
J. T. Miller, B. L. Meyers, F. S. Modica, G. S. Lane, M. Vaarkamp, and D. C. Koningsberger 395

Scanning Tunneling Microscopy Study of Pd Thin Film Catalyst. I. Effect of the Adsorbates and Surface Reaction on the Film Structure
King Lun Yeung and E. E. Wolf 409

Multinuclear NMR Studies on the Thermal Stability of SAPO-34
Yoshihide Watanabe, Akihiko Koiwai, Hisato Takeuchi, Shi-aki Hyodo, and Shoji Noda 430

Catalysis by Heteropoly Compounds. XXII. Reactions of Esters and Esterification Catalyzed by Heteropolyacids in a Homogeneous Liquid Phase—Effects of the Central Atom of Heteropolyanions Having Tungsten as the Addenda Atom
Changwen Hu, Masato Hashimoto, Toshio Okuhara, and Makoto Misono 437

The Interplay between Sulfur Adsorption and Carbon Deposition on Cobalt Catalysts
M. S. Kim, N. M. Rodriguez, and R. T. K. Baker 449

Propene Oxidation over Cu_2O Single-Crystal Surfaces: A Surface Science Study of Propene Activation at 1 atm and 300 K
Kirk H. Schulz and David F. Cox 464

Oxygen Adsorption on Supported Silver Catalysts Investigated by Microgravimetric and Transient Techniques
Dimitris I. Kondarides and Xenophon E. Verykios 481

Adsorption of CO on Small Supported Rhodium Particles: SSIMS and TPD Study
V. Matolín, K. Mašek, M. H. Elyakhloufi, and E. Gillet 492

Structure of a Nanophase Iron Oxide Catalyst
J. Zhao, F. E. Huggins, Zhen Feng, Fulong Lu, Naresh Shah, and G. P. Huffman 499

Agglomeration and Phase Transition of a Nanophase Iron Oxide Catalyst
Zhen Feng, J. Zhao, F. E. Huggins, and G. P. Huffman 510

Studies of the Desorption of Oxygen from Cu-Zeolites during NO Decomposition
Jozsef Valyon and W. Keith Hall 520

Methane Coupling Reaction on Oxide Solid Solution Catalysts
C. B. Alcock, J. J. Carberry, R. Doshi, and N. Gunasekaran 533

Hydrogenation of Aromatic Hydrocarbons over Supported Pt Catalysts. I. Benzene Hydrogenation
Shawn D. Lin and M. Albert Vannice 539

Hydrogenation of Aromatic Hydrocarbons over Supported Pt Catalysts. II. Toluene Hydrogenation
Shawn D. Lin and M. Albert Vannice 554

Hydrogenation of Aromatic Hydrocarbons over Supported Pt Catalysts. III. Reaction Models for Metal Surfaces and Acidic Sites on Oxide Supports
Shawn D. Lin and M. Albert Vannice 563

Surface Chemistry of Benzoyl Compounds on Oxides, an FT-IR Study
C. A. Koutstaal, P. A. J. M. Angevaare, and V. Ponec 573

The Structure and Activity of Silica-Supported Palladium–Cobalt Alloys. II. Skeletal Reactions of *n*-Hexane and Methylcyclopentane over Pd–Co/SiO_2 Catalysts
W. Juszczyk, Z. Karpinski, J. Pielaszek, and Z. Paál 583

The Effect of Exchange Cations on Acidity, Activity, and Selectivity of Faujasite Cracking Catalysts
R. Kumar, W-C. Cheng, K. Rajagopalan, A. W. Peters, and P. Basu 594

Sulfidation of Co/Al_2O_3 and CoMo/Al_2O_3 Catalysts Studied by Mössbauer Emission Spectroscopy
M. W. J. Crajé, V. H. J. de Beer, J. A. R. van Veen, and A. M. van der Kraan 601

Superacid and Catalytic Properties of Sulfated Zirconia
Fang Ren Chen, Gisèle Coudurier, Jean-François Joly, and Jacques C. Vedrine 616

Notes

Rearrangement of *N*-Methylaniline over H–ZSM-5, H–Theta-1, and H–Y Zeolites
Raphael C. Mordi, John Dwyer, and Roy Fields 627

Oxidative Carbonylation of Aniline Using Manganese-Based Catalysts
Kuo-Tseng Li and Yung-Ju Peng 631

Author Index for Volume 143 635

NOTICE

The Subject Index for Volume 143 will appear in the December 1993 issue as part of a cumulative index for the year 1993.

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. Originals of micrographs should also be submitted in triplicate for purposes of manuscript reviewing. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and the name and complete mailing address (and telephone and fax numbers, if possible) of the person to whom proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

If the manuscript refers to recently submitted manuscripts or papers in press (with the *Journal of Catalysis* or other journals) then please supply three copies of them so that the reviewers can judge the new manuscript in its proper context.

Revised manuscripts should be returned with one copy marked to show where changes have been made.

Notes and *Letters to the Editor* may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Systeme International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m^{-2}." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry*, 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5.5 × 8 in.; column width, 2-5/8 in.). No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Electron micrographs. Please supply three photographic copies of these so that the reviewers can inspect the fine details they contain.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. Latef, A., Aissi, C. F., and Guelton, M., *J. Catal.* **119,** 368 (1989).
2. Louis, C., and Che, M., *in* "Reactivity of Solids" (P. Barret and L. C. Dufour, Eds.), Vol. B, p. 1057. Elsevier, Amsterdam, 1985.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

Personal Computer Disks. Manuscripts may be submitted to the *Journal of Catalysis* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
